Subject: Corte Madera Inn - Submerged Aquatic Vegetation

Dear Mr. Wolff:

We were sent the following photographs of the pond at the Corte Madera Inn Rebuild Project Site. The photographs were taken on April 13 when the water in the pond had been drawn down. The photographs clearly show submerged aquatic vegetation growing within the pond at the Corte Madera Inn Site. Based on this, the pond is a special aquatic site that needs to be preserved to the maximum extent practicable. As such, we plan to attend the Town Council meeting to inform the Council that they may be approving a project that we will not be able to permit under our regulations.

Regards,

Xavier Fernandez
